

consulting

System Source has provided consulting services since 1981. We manage projects using a single point of contact and accountability for procurement, installation, support, maintenance, cloud services, training and presentation systems.

“System Source provides a wide variety of expertise and experience. By keeping all our systems at 99.9%+ uptime they are a vital part of our daily operations. They are also an invaluable asset in our strategic planning.”

Peter Smith, CFO
MTC Logistics

Menu of Services

Cloud Readiness – Return on investment calculation, plan for implementing and managing a migration to public, private, or hybrid designs including Public Cloud, Exchange, SharePoint, and Skype for Business.

Cloud Optimization – Understand if your Cloud environment is configured appropriately for cost, utilization, and security.

Security – Understand where vulnerabilities exist, what steps to take, and in what order. Penetration testing, data security, firewalls, VPN and other remote access.

Cloud Migrations – Migrate to AWS, Exchange, SharePoint, Skype for Business, and Office 365 in the cloud with training for end users.

Windows Server/Exchange Upgrades – Define requirements, analyze needs and implementation.

Server/Desktop Virtualization and Storage Management – Capacity planning, design and implementation.

Wireless Networks – Network design, coverage area and signal strength maps, implementation and verification testing.

Lifecycle Management – Patch, deployment, help desk and asset management.

Infrastructure Design – Network design, integration of routers, switches, KVMs and firewalls.

Disaster Recovery – Backup and replication strategies for fault tolerant and failover solutions to meet business needs.

RDS/Citrix Solutions – Proof of concept and performance tuning architecture on premises or in the cloud.

Workstation Deployments – Assessing, deploying, migrating, testing and project management.
